

Application of artificial neural networks to the assessment of stability using the second generation regulation in the early stages of ship design

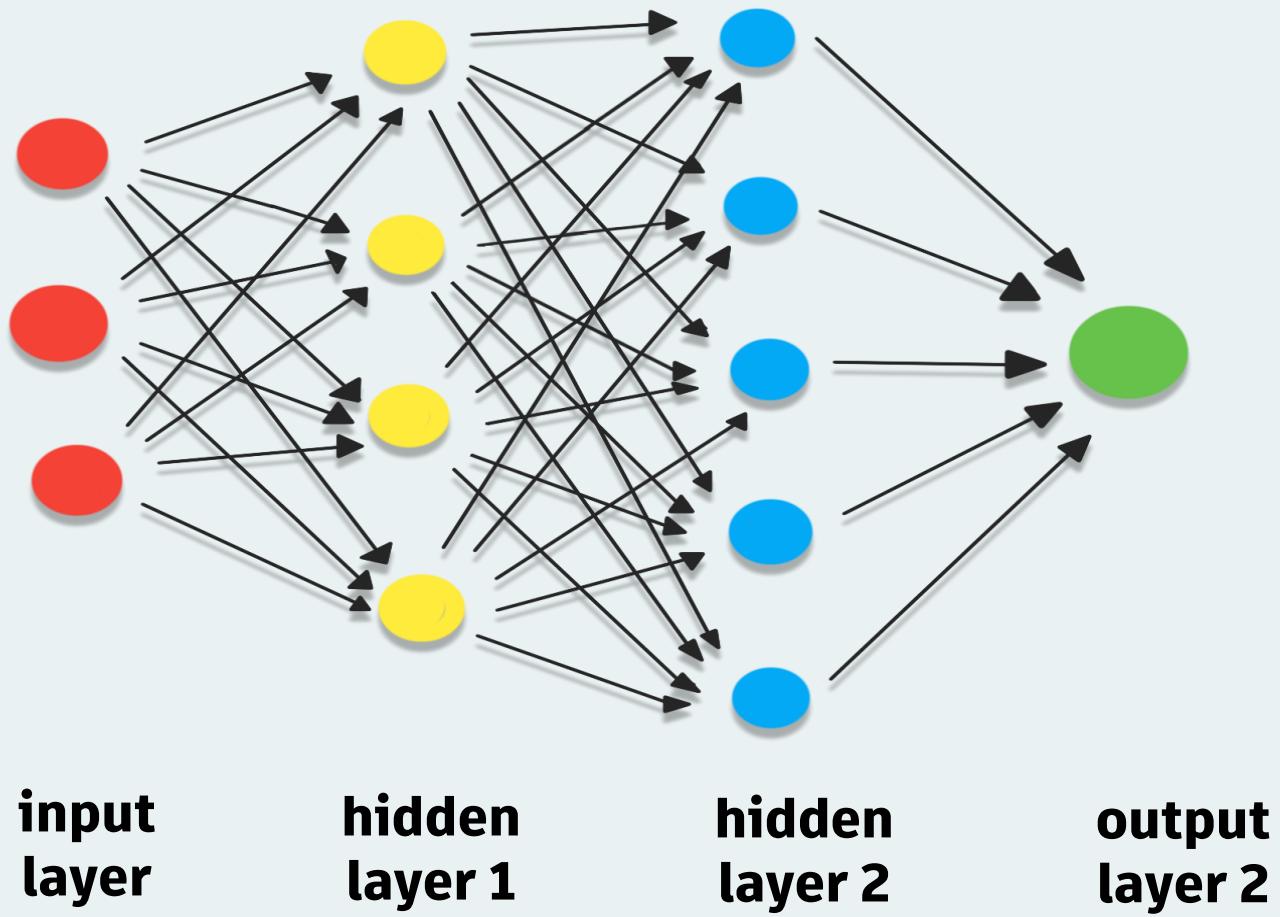

BEng Karolina Bierkowska

PhD Tomasz Hinz
MSc Grzegorz Mazerski

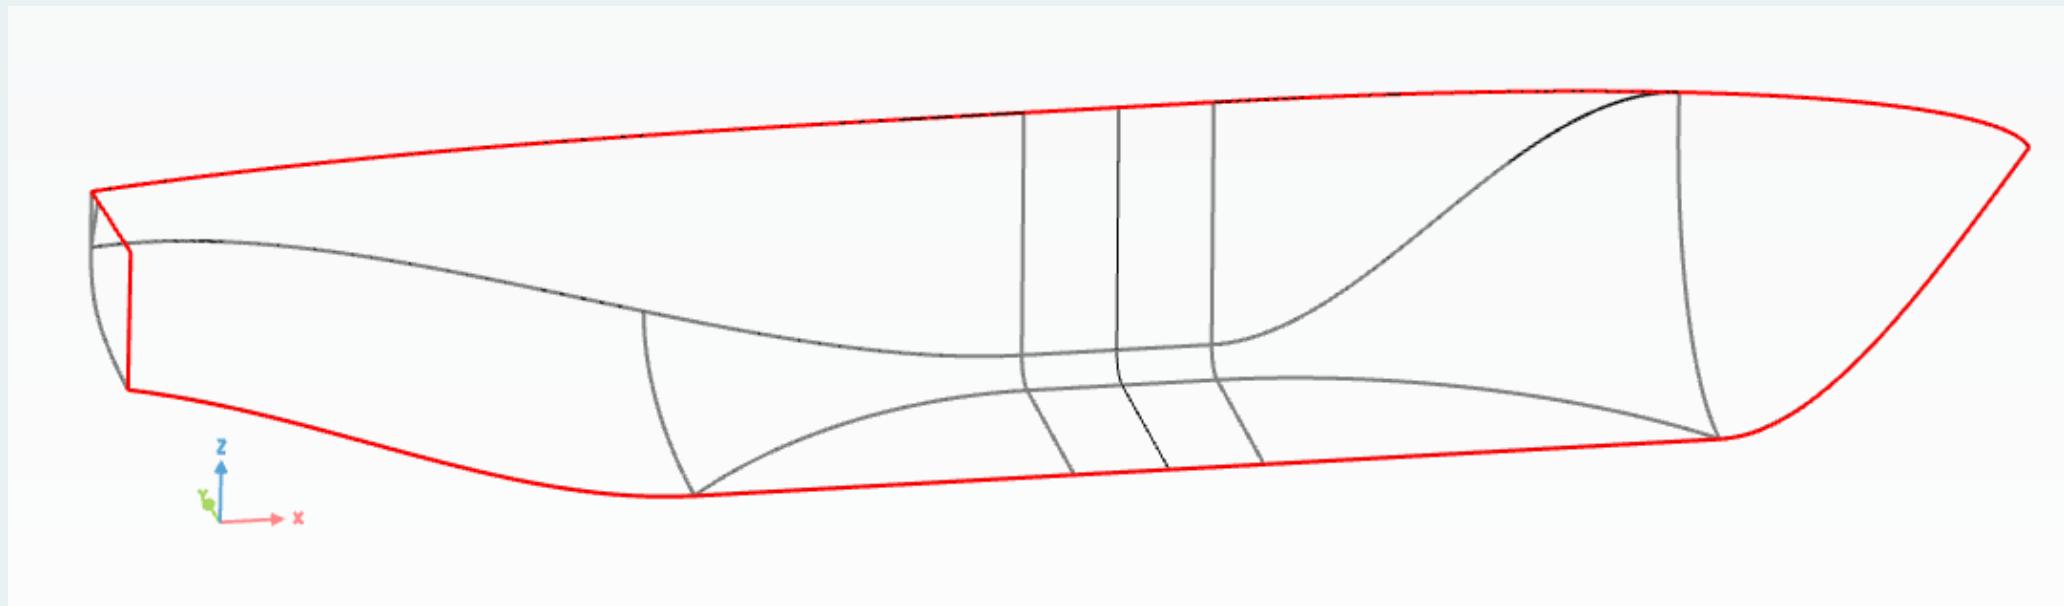

Agenda

- Aim of work
- Parametric model
- Second generation intact stability calculation
- Artificial neural networks
- Results

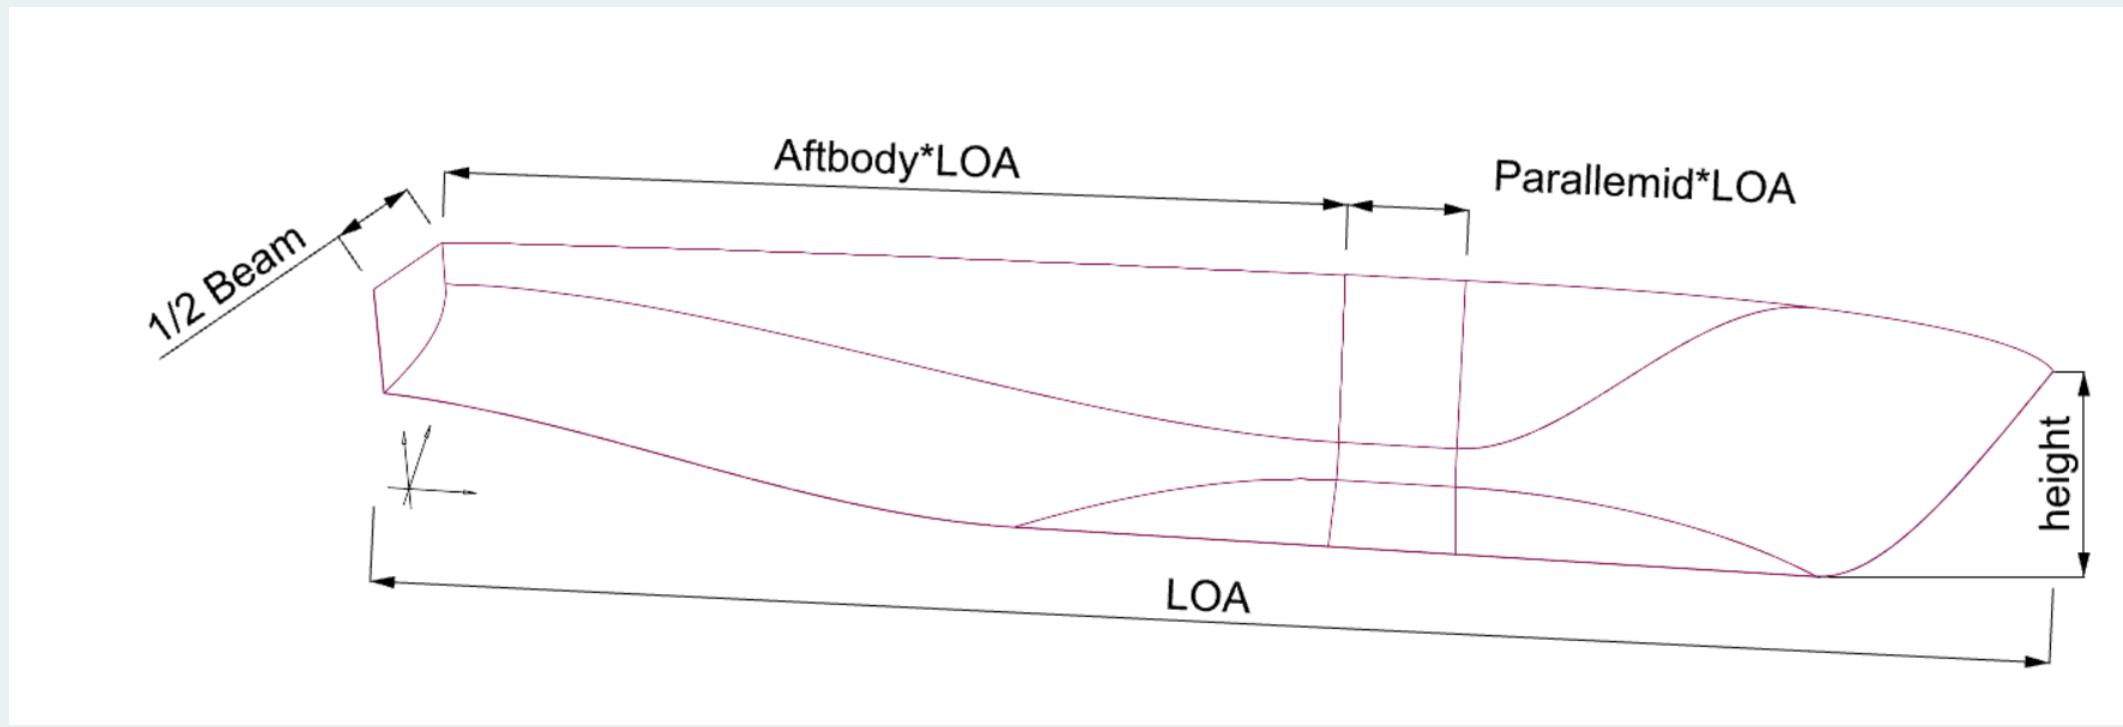

Aim of work

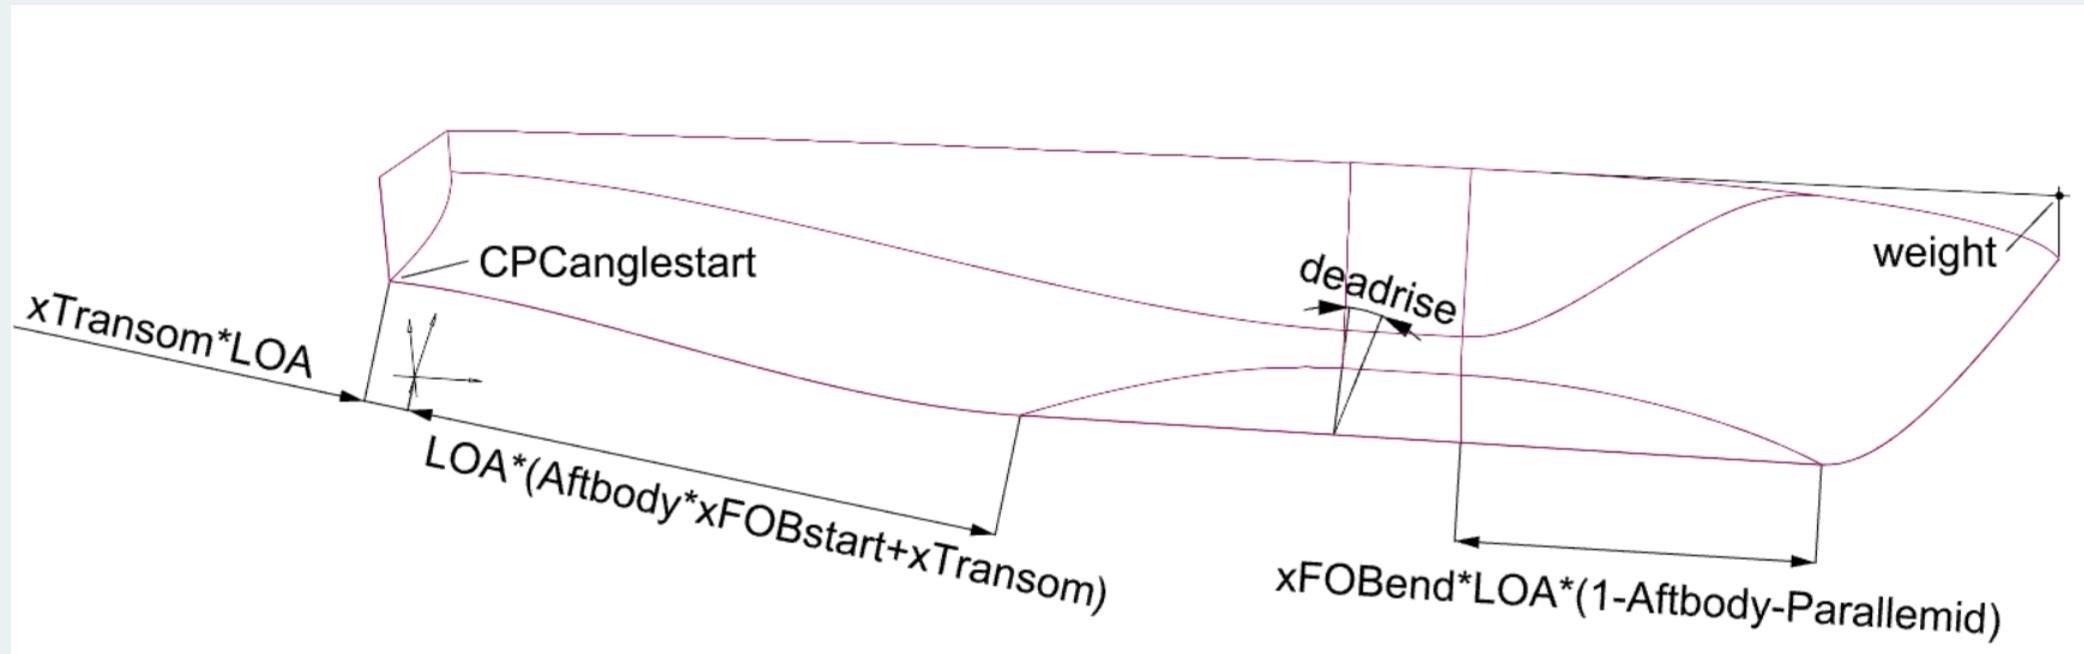

Parametric model

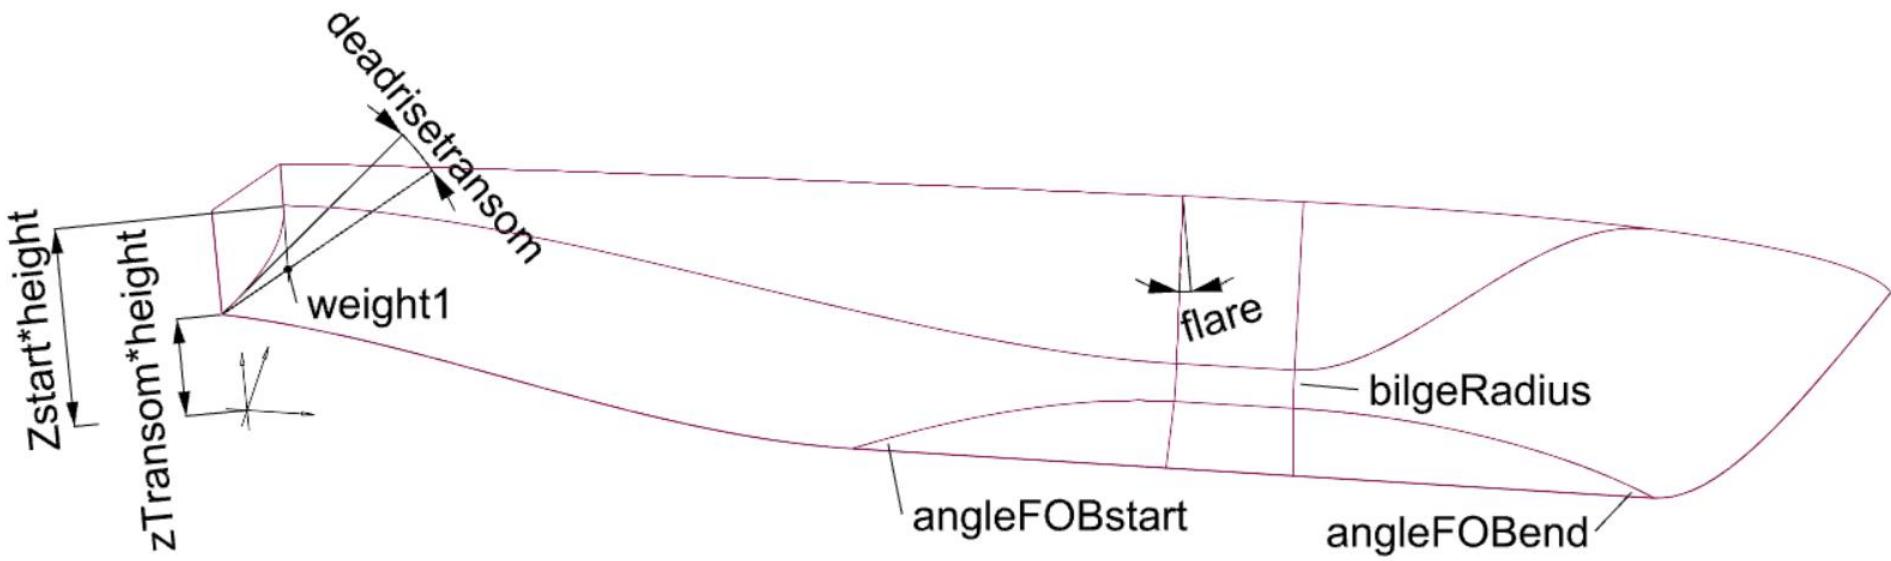

Parametric model

Parametric model

Parametric model

Parameter range

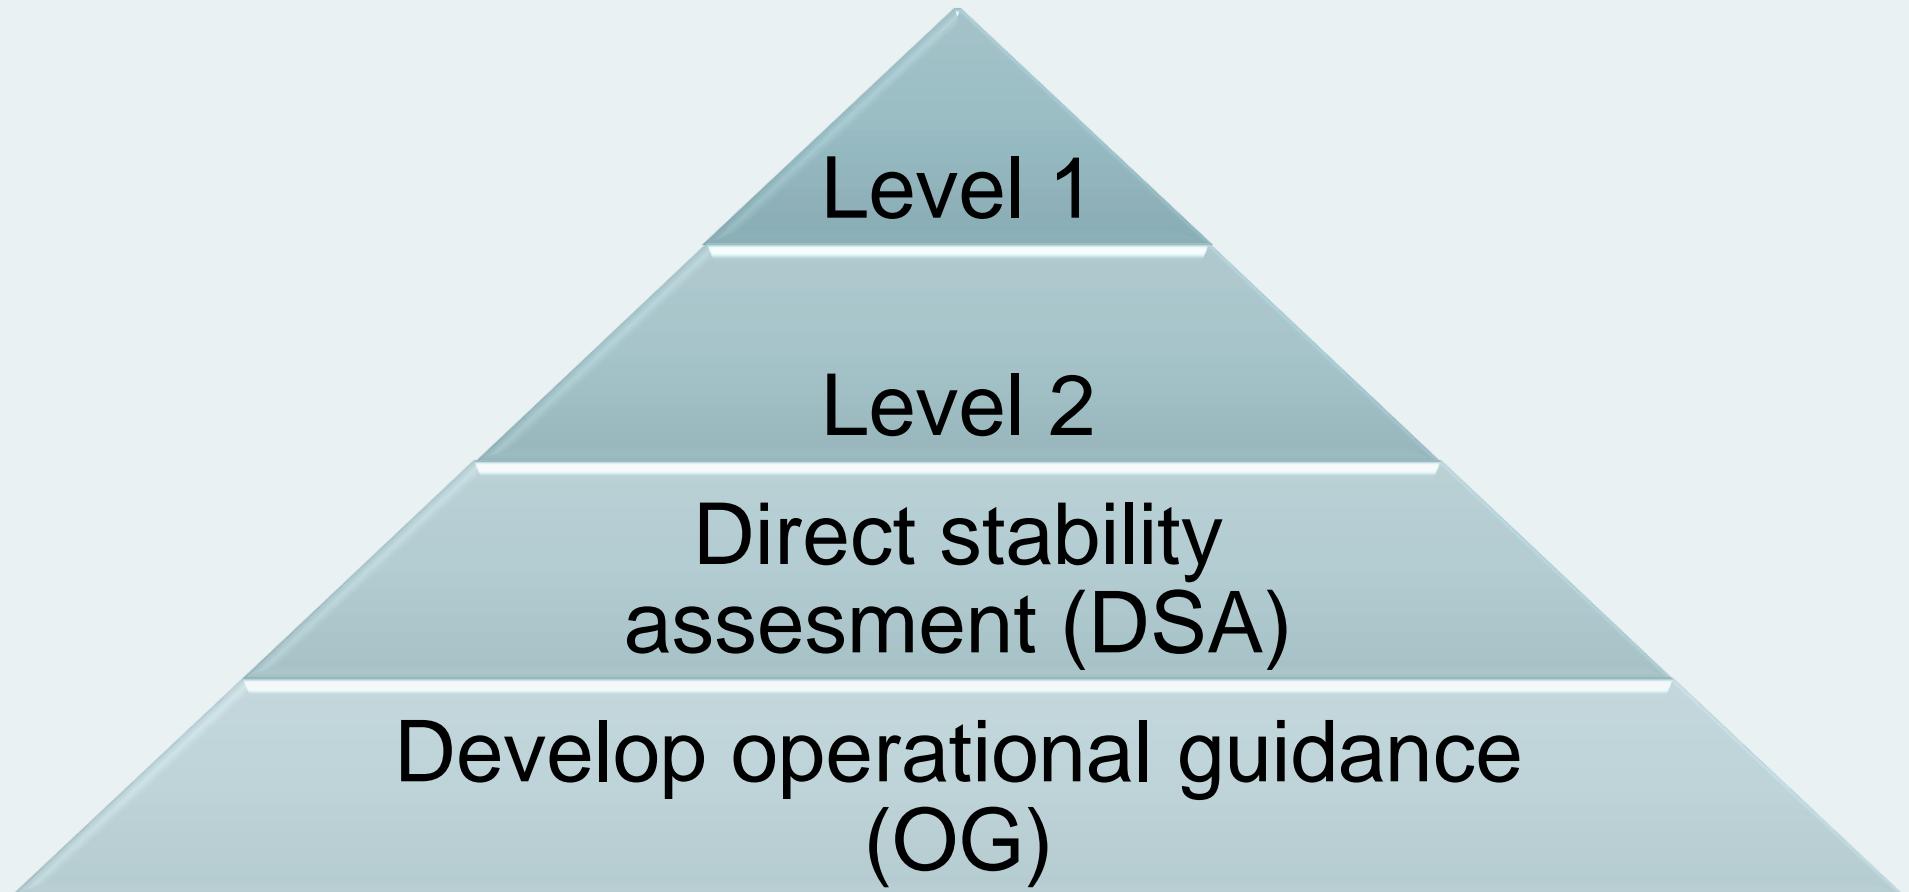

Parameter	Minimum	Maximum
Beam	15	27
Height	7.5	11.5
LOA	80	92
Aftbody	0.4	0.6
Parallelmid	0.0	0.1
Bilgeradius	0.5	2.5
xTransom	-0.1	0.0

Generate and export hulls

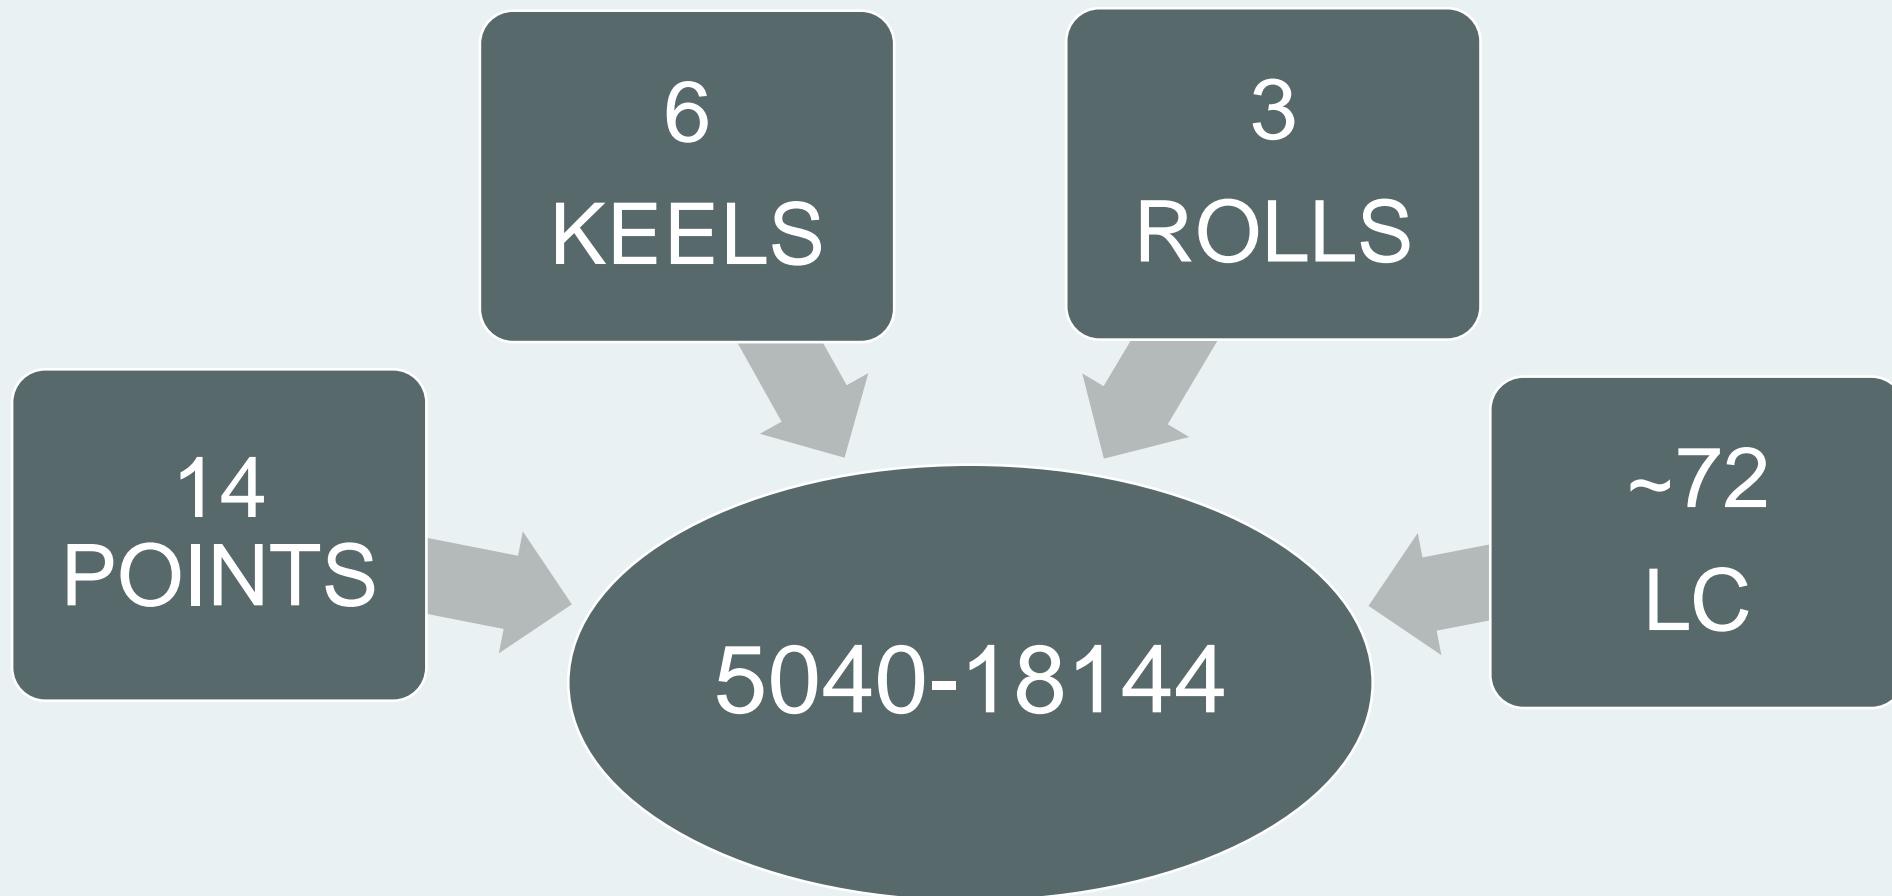

The screenshot shows the FDesignAssembler interface. On the left, there's a tree view with nodes for 'designAssembler1' (selected), 'General', and 'Design Pre/Postprocessing'. Under 'Design Pre/Postprocessing', there's a 'Preprocessing Commands' section containing the code: `[| hull.exportIG
ES_deprecate
d("hull.igs")|]`. To the right is a table with columns: beam, height, and LOA. The table lists six hulls (H0001 to H0006) with their respective values.

	beam	height	LOA
H0001	20.358745	11.25689	83.718363
H0002	19.195015	10.288452	81.147717
H0003	17.668234	7.8223473	87.482384
H0004	25.089044	8.2018852	80.767554
H0005	16.513366	8.4859867	85.235936
H0006	17.012395	9.060386	83.79963

Second Generation Intact Stability (SGIS)

NAPA

SGIS calculation results

LOA	Beam	Height	CB	MKEEL	BKEEL	GM	LCB	T	
80.001417	21.887181	8.719271	0.693483	0	1	0.151000	39.321605	5.826646	1.137461e-11
						0.289973	39.321605	5.826646	3.378292e-08
						0.872637	39.321605	5.826646	1.597238e-06

Artificial neural networks

Model name	input
model.1	LOA, Beam, Height, CB
model.2	LOA, Beam, Height, CB, MKEEL, BKEEL, GM
model.6	LOA, Beam, Height, CB, MKEEL, BKEEL, GM, APOINT, BPOINT, CPOINT, DPOINT, EPOINT, FPOINT, GPOINT, LCB
model.8	LOA, Beam, Height, CB, MKEEL, BKEEL, GM, LCB, T
model.18	LOA, Beam, Height, CB, MKEEL, BKEEL, GM, LCB, P01, P02, P03, P04, P05, P06, P07, P08, P09, P10, P11, P12, P13, P14
model.19	LOA, Beam, Height, CB, MKEEL, BKEEL, GM, LCB, T

Results of artificial neural network models

model name	R ²	threshold	A type
model.6-7	0.6455	0.4	MAX
model.6-18	0.6823	0.74	MEAN
model.8-2	0.6454	0.6	MAX
model.8-9	0.6367	0.75	MEAN

model name	layer1	layer2	layer3	layer4	layer5	layer6	layer7	layer8	layer9
model.6-7	16	32	64	128	128	64	32	16	8
model.6-18	16	32	64	128	128	64	32	16	8
model.8-2	32	64	64	32	16	-	-	-	-
model.8-9	32	64	64	32	16	-	-	-	-
